

Diamond Single Cut

The diamond single cut is a study in restraint, twenty-four deliberate facets carved to engage without overwhelming. It's the whispered compliment of the diamond world: refined, economical, and quietly confident. This cut doesn't seek to dazzle with complexity; instead, it charms through purity of form and the intimate dance of light across its surface.

Often found in gemstones sourced from the historic mines of India and Brazil, the single cut carries an old, world elegance, evoking a time when every facet was shaped by hand, and every reflection felt personal.

The Story Behind Arun's Fascination for the Diamond : Single Cut

Arun's fascination with the diamond single cut lies in its honesty. It's a form that refuses excess, demanding that the wearer appreciate nuance over ostentation. For him, it's an invitation to lean in, to appreciate the details others might miss.

In Arunashi, the diamond single cut is a reminder that complexity need not be loud, and that restraint can be a form of rebellion. It's the subtle wink across a crowded room, the quiet intelligence in a lively conversation.

Sourced from lands rich in history and craftsmanship, these diamonds carry with them stories that reward those willing to look closer, just as Arun's work rewards curiosity, wit, and the spirit of discovery.
